EDUCATION
- Columbia College
  BS Computer Science
- University of Missouri
  BA in East Asian
  Studies

COMMUNITY WORK
- Blog Post:
   What's in a degree?
- Podcast Episode:
  Imposter Syndrome

PROFILE
I am a full-stack developer with a passion for learning and problem solving. I've always had a love for computers and I enjoy using my skills to build cool things for wonderful people. I'm looking forward to work with a diverse and close-knit team at a mission driven organization

EXPERIENCE
Mid-Level Software Engineer, Complyant — 2023
- Delivered Laravel-based US Geocoder location integration to reduce address errors during customer onboarding

- Implemented site redesign using Tailwind CSS and Laravel Livewire to improve user experience and improve maintainability for developers

Full-Stack Developer, Tighten — 2017-2022
- Built web and mobile applications (Laravel + VueJS, React, React Native) for clients, including tech & e-commerce platforms and multiple non-profit organizations in education, mutual aid fellowships, and community infrastructure

- Collaborated on small teams to execute goals and used a collectively developed a weekly status update process to communicate product features, functions, and maintenance requirements to clients

- Concurrently developed web-based and mobile apps, enabling users to easily manage complex data structures from either application via an API

- Migrated legacy applications (up to 20 years old) to modern, supported versions of Laravel PHP

- Worked directly with clients to create software that meets their needs, including full application development, implementing new features, and maintenance/bug fixes

SKILLS
Test-driven development, Attention to detail, Communication with both technical and non-technical clients, Responsive Design, Hybrid Mobile development

LANGUAGES AND TECHNOLOGIES
TALL stack (Tailwind CSS, Alpine.js, Laravel PHP, Livewire), MySQL & PostgreSQL, VueJS, React, Javascript, React Native, NPM, Git, REST Api, Laravel Nova, Filament, Statamic
